

# Vocal Coaching *Packages*

Further detail into the various options you can pick for your child.

It's important to remember every child will thrive better in different timeframes - if your little one takes a while to settle in then a 45 minute session is better suited. If this is a hobby your child has shown an interest on then trying 30 minutes is the best way to allow your child to grow in confidence with each session.

30  
MINUTES

**Ideal for:**

- Younger children
- First-time singers
- Confidence-building

30 minute sessions are a great way to help a child start finding their voice. These shorter sessions will follow a fun warm up filled with fun and technique. Followed by working on a song picked by the child. These sessions will give your child a chance to shine without getting bored or feeling overwhelmed for younger children around 6 - 10 this is a recommend time frame I recommend.
